EDUCATION

University of California, Los Angeles

Sep 2025 – Present

Bachelor of Science, Computer Science (GPA: 3.8)

Los Angeles, CA

Minors in Math and Entrepreneurship

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Discrete Mathematics

EXPERIENCE

Bruin Software Engineers

Oct 2025 – Present

Internal Vice President & Webmaster

Los Angeles, CA

- Developed the club website using Next.js, React, and Tailwind, and deployed it via Vercel to provide fast, reliable access for **400+** members, **60+** alumni connections, and **2** company sponsors
- Oversaw all finance, operations, and education initiatives to coordinate team efforts & host the inaugural **New Year's CS Summit** at UCLA and **Build It Break It Hackathon** at Google

ACM @ UCLA

Nov 2026 – Present

Board Dev Team Project Manager

Los Angeles, CA

- Led **end-to-end migration** of a legacy React/Redux codebase to Next.js/Jotai, boosting Lighthouse performance scores to **94** and standardizing state management flows
- Implemented a **full-stack image upload and hosting system** using Express and PostgreSQL, replacing messy third-party links with direct server uploads to streamline content management

theCoderSchool

Apr 2025 – Sep 2025

Code Coach

Yorba Linda, CA

- Delivered weekly 1-on-1 lessons to **6** students, covering fundamental concepts in Python and Lua
- Directed two 3D game development summer camps where **20+** students designed and built end-to-end Roblox games, fostering deep creative development and advanced programming skills

PROJECTS

StackedCV | Next.js, React, Tailwind, Derie

Summer 2026 – Present

- Implemented **drag-and-drop reordering** and live-updating PDF export across **16** distinct resume templates (@dnd-kit, pdfjs-dist), keeping presentation fully decoupled from underlying data
- Integrated LLM-powered features on **Groq (Llama 3.3 70B)**, including resume import from unstructured text or LinkedIn profiles, job-description matching with per-entry relevance scoring, AI cover letter generation, and bullet rewriting

Accent | Python, Swift

Spring 2026

- **2x Winner** of the Light the Way and Figma Make tracks at **LA Hacks 2026**
- Built an orchestration framework integrating a **VLM classifier** with an intent resolution pipeline
- Designed an accessible SwiftUI interface, targeting usability for elderly and low-tech-literacy users

Munch | Python

Fall 2025 – Present

- On track to serve **6K+** **daily active users** by architecting a FastAPI backend server and scraper for a university dining app, ensuring high availability and stable performance for UCLA students

SKILLS

Languages: TypeScript, JavaScript, Swift, Python, Lua, C++, HTML/CSS

Frameworks: Node.js, Next.js, React, Tailwind, SwiftUI, discord.js

Tools: AWS, Claude Code, Git, Docker, Vercel, VS Code, Xcode
